

Superstore-Sales-Analysis

Dashboard 1 — Executive Overview

Insight 1

Sales and order volume show a consistent upward trend over the years.

Insight 2

The West region contributes the highest overall sales and profits.

Insight 3

Consumer segment contributes the majority of total revenue.

Recommendation

Expand successful regional and customer strategies into lower-performing markets.

Dashboard 2 — Product Performance

Insight 1

Technology category generates the highest revenue and profitability.

Insight 2

Certain sub-categories receive high order volumes but contribute lower profits.

Insight 3

Customer product preferences vary across segments.

Recommendation

Focus inventory and marketing efforts on high-performing products and profitable categories.

Dashboard 3 — Customer & Geographic Analysis

Insight 1

A small group of customers contributes a significant portion of revenue.

Insight 2

Some cities consistently underperform in profitability despite generating orders.

Insight 3

Customer distribution varies significantly across regions.

Recommendation

Develop targeted customer retention and regional marketing strategies.

Dashboard 4 — Operational Insights

Insight 1

Higher discount levels negatively impact overall profitability.

Insight 2

Shipping duration varies across regions and product categories.

Insight 3

Operational inefficiencies may affect customer satisfaction and margins.

Recommendation

Optimize discount policies and improve logistics efficiency in delayed regions.
